

Radiologic Technology Expectations

Clinical Experience in Radiologic Technology

The purpose of clinical education in Radiologic Technology is to allow the student to apply theoretical principles of radiography, patient care and departmental procedures to practical experience. The student's role in the clinical setting is one of a learner and not a staff radiologic technologist.

Clinical education will be arranged by Georgia Northwestern Technical College in conjunction with the affiliating clinical facilities. While the student is in the clinical department he/she must observe the regulations imposed by the affiliating clinical facility with regards to patient safety and welfare. Also, the assigned schedule of experience must be followed closely.

The clinical education experience is divided into four clinical education courses. Progression from one clinical education course to another is based on completion of course requirements. Specific clinical assignments are related to clinical experiences from previous terms and to academic courses required in specific terms.

Students are assigned a limited number of weekend and evenings clinical rotations per term.

Transportation

Transportation to class and clinical affiliates is the responsibility of the student. The travel time from point of residence to class or clinical assignment is not school activity time; therefore, it is the student's own time. Clinical rotations include, day, evening, and weekends at facilities located in geographically dispersed areas. It is the student's responsibility to arrange transportation.

Records and Assignments

Each term, students will be required to maintain records and complete assignments. These requirements are considered an integral part of the learning process. These records and assignments represent the student's part in determining and maintaining quality in the program and include, but are not limited to:

Clinical Settings Available:

Below is a list of clinical sites the Radiology program utilizes. This list may change without notice. Students are placed at clinical sites by GNTC Radiology faculty, not by student request. Students will rotate to different clinical sites each semester.

Advent Health Systems Gordon
1035 Red Bud Road
Calhoun, GA 30701

Piedmont Cartersville Medical
Center 960 Joe Frank Harris
Parkway Cartersville, GA 30120

Atrium Floyd Medical
Center 304 Turner McCall
Blvd Roma, GA 30165

Harbin Clinic
150 Gentilly Blvd
Cartersville, GA 30120

Harbin Clinic Rome 1825
Martha Berry Blvd Rome,
GA 30165

Medical Associates of North Georgia
320 Hospital Road
Canton, GA 30114

Atrium Polk Medical Center Floyd Health
Care 2360 Rockmart Highway
Cedartown GA 30125
